

STUDENT TESTIMONIAL

The best things about this class is that it is done all independently. In my other classes the teacher is constantly lecturing and my brain pretty much goes into a coma. I like being able to have the choice of doing what I want. The worst thing about this class is pronunciation, but that is because I'm just not good at matching my voice with the computer's voice.

My motivation to be a Super Star is, first of all, because I'm a huge nerd with school stuff. B's are not OK with me. I can not help it. Additionally, I wanted to be a Super Star because now, while everyone is taking the midterm, I get to study for other exams and listen to music.

My greatest challenges in this class were pronunciation and grammar. This is just because I am not very good at these two projects. My strategy to get all the projects done was to work every minute I am in class.

When I am done with the quarter we are in, I start on next quarter. The order I do things in is Grammar, Rosetta Stone, Impromptu, Flashcards and then Pronunciation.

I manage my time by just making sure I am working every minute I am in class. Then all the work will get done. I stay on task because I have music to listen to.

My top 5 tips are: work every minute you are in class, work fast, don't talk, do the hard things first, and listen to music.
